Press Release

Y-Logimed: Strategic Partnership with Abbott Vascular for the distribution of its Cardiology Products

Y-Logimed, a subsidiary of HYGEIA Group operating in the trade and distribution of medical devices, is announcing its new strategic partnership with Abbott Vascular, for the distribution of its Cardiology products.

This partnership paves the way for Y-Logimed to manage a wide portfolio of Interventional Cardiology products, including Bare Metal Stents, Drug Eluting Stents, Balloon Dilatation Catheters, Guide Wires and an array of related products. Abbott's Interventional Cardiology products are widely accepted and recognized, both in Greece and internationally, for their utmost effectiveness in the treatment of coronary disease.

Commenting on the partnership, Y-Logimed's CEO, Mr Michalis Stavrou, said, "With HYGEIA Group's support, along with Abbott's educational and scientific input, Y-Logimed attains a significant position in the Greek Interventional Cardiology market. Through this partnership and by relying upon our business potential, our company will manage a broad portfolio of products, made available within the HYGEIA Group as well as to the wider private and public healthcare market."

Y-LOGIMED S.A.
