Press Release

MITERA Children's Hospital:  
Med Tests at Special Rates for Safe Sports Activities

MITERA Children's Hospital, a member of HYGEIA Group, is standing by students and their families for yet another school year, offering comprehensive med test packages for safe sports activities, at special rates.

**1. Basic sports package at €50:** It includes heart exam, ECG, heart pulsed-wave Doppler and eye test.

**2. Comprehensive sports package at €70:** It includes heart exam, ECG, heart pulsed-wave Doppler, eye test and complete blood count (blood test, urine test, iron, ferritin, blood glucose, cholesterol, triglycerides).

To book an appointment, call on: +30 210 6869 788 and +30 210 6869 360.

Given that a child's development is a significant and multifaceted process that often troubles parents, the Hospital also offers the possibility of a **developmental assessment** by an endocrinologist for your child **at the special rate of €80**, as well as an **obesity test at €120** (it includes examination by endocrinologist, dietitian and psychologist). Early detection and intervention often lead to optimal results and less emotional stress for the child and its family, while they also assist in highlighting all of your child's abilities, both on an emotional and a cognitive level.

To book an appointment for these exams, call on +30 210 6869 563-4. The med test packages cater for children **up to 16 years of age** and are only valid by appointment **until October 31, 2015**.

Commenting on the initiative, **MITERA Hospital's CEO, Mr Dionysis Papatheodorou**, stated, "The most valuable asset for students in this difficult endeavor they are embarking on is their health, which we ought to protect in every possible way. Besides, prevention is the most effective cure. For this reason, MITERA Children's Hospital yet again raises the bar in public health, and wishes a happy and creative school year to all the students."
